Before You Start

We've designed the Oster Deluxe Bread and Dough Maker to be easy to use. But, like any kitchen appliance, it requires proper use and

Using Your Bread Maker Safely

Before Use

1. Read all instructions.
2. Make sure to remove all foreign matter from the baking pan.
3. Peel off plastic film from control panel and remove static labels.
4. Plug the Bread Maker into a properly wired outlet.

Where to Use

1. Use only on a stable, heat-resistant surface.
2. Do not use the Bread Maker where it will be exposed to direct sunlight or other heat sources, such as a stove or oven.
3. Keep the Bread Maker out of the reach of children -- it's hot! Also, if any buttons are accidentally touched during operation, baking may stop.
4. Place the unit at least two inches away from walls. If you do not, walls may become discolored.

While in Use

1. The temperature is very hot during operation. Be careful to keep your hands and face away from the unit.
2. Do not open the lid or remove the bread pan during operation except as indicated by the fruit/nut beep. The beep sounds three times, indicating that it is time to add fruit, nuts, or other ingredients to the baking pan.
3. Do not place anything on the Bread Maker lid. Do not cover vents.

After Use

1. Use oven mitts or a pot holder when taking out the bread pan after baking.
2. Make sure to disconnect the power by unplugging the unit. Allow the Bread Maker to cool down before storing.
3. Read instructions before cleaning. Do not immerse the unit in water. This will cause electric shock and/or damage to the unit.
Important Safeguards

When using electrical appliances, basic safety precautions should always be followed including the following:

1. Read all instructions, product labels, and warnings before using the Bread Maker.
2. Do not touch hot surfaces. Always use oven mitts when handling hot materials, and allow metal parts to cool before cleaning. Allow the Bread Maker to cool thoroughly before putting in or taking off parts.
3. When unit is not in use and before cleaning, unplug the Bread Maker from wall outlet.
4. To protect against risk of electrical shock, do not immerse the appliance or its plug(s) in water or other liquids.
5. Close supervision is always necessary when this or any appliance is used by or near children.
6. Do not allow anything to rest on the power cord. Do not plug in cord where people may walk or trip on it.
7. Do not operate this or any appliance with a frayed or damaged cord or plug or after the appliance malfunctions or is dropped or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or electrical or mechanical adjustment.
8. Avoid contact with moving parts.
9. Do not use attachments not recommended by the manufacturer; they may cause fire, electric shock or injury.
10. Do not use outdoors or for commercial purposes.
11. Do not let the cord dangle over the edge of a table or counter or touch hot surfaces. Do not place on an unsteady or cloth-covered surface.
12. Do not place the appliance near a hot gas or electric burner or in a heated oven.
13. To unplug, press the “STOP” button, grip plug and pull from wall outlet. Never pull on the cord.

Save These Instructions

14. Use of extension cords: A short power supply cord has been provided to reduce the risk of injury resulting from becoming entangled in or tripping over a longer cord. Extension cords are available from hardware stores and may be used with care. The cord should be arranged so that it will not drape over the counter or table top where it can be pulled by children or tripped over accidentally.
15. Electrical power: If electric circuit is overloaded with other appliances, your Bread Maker may not operate properly. The Bread Maker should be operated on a separate electrical circuit from other operating appliances.
16. Polarized plug: To reduce the risk of electrical shock, this appliance has a polarized plug (one blade is wider than the other). This plug fits a polarized outlet only one way; if the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

This unit is intended for household use only.
Bread Mix Instructions

1. Remove the bread pan from the Bread Maker. Add 1 cup of warm water to pan. Open bread mix packet and empty contents into pan. Dig a small hole in the breadmix and add the yeast packet.

2. Insert the pan firmly into the bottom of the machine, applying pressure to each corner of the pan to make sure it is snapped tightly into the retaining brackets. If you are unsure, apply pressure once more to each corner of the pan.

3. Now press “Start.” Your bread will be done in the amount of time indicated on the timer. When it is done, you’ll hear five beeps. That’s the cue to take the pan out of the machine. A word of caution, the pan will be hot, so use pot holders. It’s best to let your bread cool for 15 minutes before slicing. Enjoy!

(There directions only apply if your Bread Maker has bread mix included. Should you purchase bread mix from a grocery store or specialty store, be sure to follow the instructions on the box for best results.)
A Symphony of Ingredients

Like the instruments in an orchestra, the ingredients in basic bread are very simple: flour, sugar, salt, a liquid (such as water or milk), possibly a fat (such as butter or oil), and yeast. And, like each musical instrument, each ingredient performs a specific job, and each lends a special flavor to the final masterpiece.

That’s why it’s important to use the right ingredients in exactly the right proportions to ensure you get the most delicious results!
Basic Ingredients

Yeast
Yeast is actually a microscopic plant. Simply stated, without yeast, your bread will not rise. When moistened by a liquid, fed by sugar, and carefully warmed, yeast produces gases which power the dough to rise. If the temperature is too cold, the yeast will not be activated; if it’s too warm, it will die. The Oster Deluxe Bread and Dough Maker takes care of this worry for you by maintaining just the right temperature in the baking chamber at all times, you can use either “active dry yeast”, “quick acting”, “rapid rise yeast” or one of the new “Bread machine yeasts” in your Oster Deluxe Bread and Dough Maker.

Sugars
Sugars sweeten the bread, brown the crust, and lend tenderness to the texture. These jobs can be performed by white or brown sugar, molasses, maple or corn syrups, honey, fruits or other sweeteners.

Flour
In order for the bread to rise, the flour has to have a high protein content. You should always use a “bread flour” (for white bread recipes) in your bread maker to get the best results. Do not use all-purpose, cake flour or self-rising flour.

Unlike white bread flour, whole wheat flour contains bran and wheat germ which inhibit rising. Wheat breads therefore tend to be heavier in texture and smaller in size. A lighter larger loaf can be achieved by combining whole wheat flour with white bread flour for wheat bread recipes.

Liquids
When liquids are mixed with the proteins in flour, gluten is formed. Gluten is necessary for rising. Many recipes use dry milk, but other liquids, such as fruit juice, beer, and water work too. It’s a delicate balance: A recipe with too much liquid may cause the bread to fall during baking while a recipe with too little liquid will not rise.

Salt
Salt inhibits rising, so be very careful measuring. Any ordinary table salt will do.

Fats
Many breads use fats to enhance the flavor and retain moisture. Typically, we use margarine in these recipes, but butter may also be used.
Important Measuring Tips

Because each ingredient plays such a specific role, it is especially important to measure the ingredients exactly to get the best results.

For dry ingredients, use a standard measuring spoon or measuring cup -- not a tableware spoon or coffee cup -- and level off. For flour, simply spoon the flour into a measuring cup and level off with a flat kitchen utensil.

For liquids, fill a standard measuring spoon or measuring cup to the level indicated. Check your cup measurement by placing the measuring cup on a flat surface.

For solid fats, fill a standard measuring spoon or measuring cup to the level indicated and level off with a kitchen utensil.

Last Things Last!

You'll see this tip in several places in this book, but it bears repeating: Always put the liquids in first, the dry ingredients in next, and the yeast last. Before adding the yeast, dig a shallow hole in the dry ingredients and place the yeast in the hole so that there absolutely no contact between the liquids and the yeast. You don’t want the yeast to be activated too soon in the process. This is especially important when you’re using the Delay bake option.

Adding Fruits and Nuts

Fruits and nuts are added later, after the machine has completed the first knead. The machine will beep three times to let you know it is time to add fruit or nuts. If they are added before the fruit nut beep, the fruit will be pureed due to excessive kneading.

If fresh fruits or perishable ingredients are called for in a recipe, (i.e., eggs, cheese, milk) do not use the Delay bake option.
The Process Simplified

Mixing, Kneading, Rising, Baking...here's a glimpse of how the Oster Deluxe Bread and Dough Maker automatically does all the steps for you.
Mixing and Kneading
In standard bread baking, the baker mixes the ingredients first by stirring, then by kneading the dough by hand. The Oster Deluxe Bread and Dough Maker mixes and kneads the dough automatically for you.

Rising
When making bread by hand, the dough is placed in a warm place to rise after mixing so that the yeast can ferment and produce gas. After mixing the dough, the Oster Deluxe Bread and Dough Maker maintains the optimum temperature for rising during this part of the process.

If you are using the Dough Only cycle, the Oster Deluxe Bread and Dough Maker will stop at the end of the first rising. You will hear a series of 5 beeps to let you know it’s done. The dough can now be removed and shaped - for bagels, pizza or other creations - and placed in your own oven for baking.

Punch Down
Once the dough has risen, the baker will typically “punch down” the dough. This process helps to break apart large, unwanted pockets of air and gas that have developed through rising, giving the bread a more even and appetizing texture. This Oster Deluxe Bread and Dough Maker handles this process automatically for you by turning on the kneading blade for just the right amount of time.
Second Rise
After it is punched down, the bread bounces back -- it rises a second time. Some breads require shorter or longer rising times. For example, wheat breads require a longer rising time because the flour contains bran and wheat germ which inhibit rising. The Oster Deluxe Bread and Dough Maker regulates the temperature and timing of this second rise automatically for you based on your selection.

Bake
The Oster Deluxe Bread and Dough Maker automatically regulates baking time and temperature for perfect results every time!

Cool
In standard baking, the baker removes the bread from the pan immediately to keep the crust from turning soggy. We recommend that you do the same with the Oster Deluxe Bread and Dough Maker, too.
Getting to Know Your Deluxe Bread and Dough Maker

The best way to get there is to use this map. Soon you’ll know the electronic bread-baking territory the way you know your own kitchen. In the meantime, here are some easy-to-follow directions to get you started.
The electronic Control Panel tells the Oster Bread Maker what to do. For complete directions, see page 16.

Removable Bread Pan is made of cast aluminum for even baking. Bread Pan shown in diagram with attached pan extension. To attach pan extension, remove pan from baking chamber, hook one side of pan extension over lip of pan and snap into place. To remove pan extender, pull up on the snap side of extender and separate. Insert the pan firmly into the bottom of the machine, applying pressure to each corner of the pan to make sure it is snapped tightly into the retaining brackets. If you are unsure, apply pressure once more to each corner of the pan.
**The Control Panel**

- The yellow light indicates that the delay option is being used.
- The green light indicates that the machine is on.
- The red light indicates that the bread is done.

Use the arrow button to move the blinking light on the LCD display to your selection.

Use the SELECT button to lock in your choice.

The START button tells the bread maker to begin operation.

**The LCD Display**

- The HOUR and MIN buttons allow you to set the timer for the delay function.
- The STOP button tells the bread maker to stop everything.
- The bread row allows you to select your bread type.
- Rapid bake reduces the overall completion time by about 20%.

Questions? You can call us toll free at 1-800-526-2832.
Step-by-Step Directions

1. Peel off the plastic film cover from the control panel and remove the static label from the front of the machine.

2. Next remove the bread pan from the Bread Maker. Make sure the kneading blade is placed securely in the bottom of the pan.

3. Measure all ingredients into the bread pan in the order they are listed. (Before adding yeast, remember to dia a small hole in the flour so that the yeast doesn't prematurely come into contact with the liquids. This is especially important when you're using the delay bake timer.)

4. Wipe water and other spills from the outside of the pan; then insert the pan firmly into the bottom of the machine, applying pressure to each corner of the pan to make sure it is snapped tightly into the retaining brackets. If you are unsure, apply pressure once more to each corner of the pan.

5. Close the lid and plug in the breadmaker. The LCD display will flash and then go blank, indicating that your unit is ready for operation.

6. CHOOSE YOUR BREAD TYPE. Use the arrow button to move the blinking light to the type of bread you want. Press the select button to lock in your choice. Hint: If your recipe is a 1-1/2 pound loaf of bread that uses the white cycle and you want a medium crust color, press the start button button. This is a built-in default.

7. SELECT YOUR CRUST COLOR. Use the arrow button to move the blinking light to your choice of crust color. Press the select button to lock in your choice. (Note: For whole wheat breads, medium is your only choice.)

8. IF YOU WANT TO USE THE RAPID CYCLE. The rapid bake function shortens the overall completion time by about 20 percent. Breads baked on the rapid cycle are generally smaller because of a shorter rising time. If you wish to use the rapid cycle press select when RAPID is blinking, otherwise press the arrow key to skip to the next step.

9. SELECT YOUR LOAF SIZE. Use the arrow button to move the blinking light to your choice of loaf size and then press select to lock in your choice. Your bread will be ready in the number of hours and minutes indicated on the timer, unless you want to use the delay bake cycle.

10. IF YOU WANT TO USE THE DELAY FUNCTION. This function lets you delay the completion of your bread until a later time. If you want your bread done 10 hours from now — in time for dinner, let's say — you need to tell the Bread Maker to delay the onset of operation. Do this by using the HOUR and MIN buttons to change the timer setting. (Note that the maximum delay is 13 hours; the minimum delay is 3 hours and 45 minutes). When you have entered the number of hours from now that you want your bread to be done, press start and your Bread Maker will go to work. The yellow delay button will be on indicating that the machine has properly received your instructions.

We recommend that you do not use the delay function on sweet breads, as these recipes contain perishable ingredients that may spoil.

11. TO ADD FRUITS OR NUTS (MIX-INS). The Bread Maker will beep five minutes after the first rise. Carefully open the lid of the Bread Maker and add any fruit or nuts that the recipe requires. Close the lid.

12. WHEN THE BREAD IS DONE. The Bread Maker will beep five times and the timer will indicate 0:00. The bread is best taken out of the pan immediately. Remove the pan using potholders, and slide the bread out of the pan. It's best to let your bread cool 1 minute before slicing. Enjoy!

13. The unit needs to cool for at least one half hour before using it again. The display panel will read “Hot” until the unit is ready to use. Allow your bread maker to cool before cleaning and storing. (See page 53)
Important Measuring Tips

Because each ingredient plays such a specific role, it is especially important to measure the ingredients exactly to get the best results.

For dry ingredients, use a standard measuring spoon or measuring cup -- not a tableware spoon or coffee cup -- and level off. For flour, simply spoon the flour into a measuring cup and level off with a flat kitchen utensil.

For liquids, fill a standard measuring spoon or measuring cup to the level indicated. Check your cup measurement by placing the measuring cup on a flat surface.

For solid fats, fill a standard measuring spoon or measuring cup to the level indicated and level off with a kitchen utensil.

Last Things Last!

You’ll see this tip in several places in this book, but it bears repeating: Always put the liquids in first, the dry ingredients in next, and the yeast last. Before adding the yeast, dig a shallow hole in the dry ingredients and place the yeast in the hole so that there’s absolutely no contact between the liquids and the yeast. You don’t want the yeast to be activated too soon in the process. This is especially important when you’re using the Delay bake option.

Adding Fruits and Nuts

Fruits and nuts are added later, after the machine has completed the first knead. The machine will beep three times to let you know it is time to add fruit or nuts. If they are added before the fruit nut beep, the fruit will be pureed due to excessive kneading.

If fresh fruits or perishable ingredients are called for in a recipe, (i.e., eggs, cheese, milk) do not use the Delay bake option.

Placement Counts!
Place dried fruits, vegetables, and dried spices away from the liquid ingredients in the bread pan. If they soak up water, they can undermine the bread’s chemistry.

Freshness First
Avoid using perishable ingredients – milk, yogurt, eggs, or cheese – with the Delay bake function.

Just Wait Fifteen
For best results, wait fifteen minutes before slicing; the bread needs time to cool.

Deep Freeze
To freeze fresh bread, let it cool completely and double-bag in plastic.
White Bread Recipes

Traditional White Bread

Large Loaf (1 1/2 pounds)
1 cup plus 2 tablespoons water
1 tablespoon margarine or butter, softened
3 cups Gold Medal Better for Bread™ flour
2 tablespoons sugar
1 tablespoon dry milk
1 1/2 teaspoons salt
1 3/4 teaspoons regular active dry yeast
OR
1 3/4 teaspoons bread machine yeast or quick-acting active dry yeast

Small Loaf (1 pound)
3/4 cup plus 2 tablespoons water
2 teaspoons margarine or butter, softened
2 cups Gold Medal Better for Bread™ flour
1 tablespoon sugar
2 teaspoons dry milk
1 teaspoon salt
1 1/4 teaspoons regular active dry yeast
OR
1 3/4 teaspoons bread machine yeast or quick-acting active dry yeast

Potato Bread

Large Loaf (1 1/2 pounds)
1 1/4 cups water
2 tablespoons margarine or butter, softened
3 1/4 cups Gold Medal Better for Bread™ flour

Dough:
3/4 cup water
2 tablespoons margarine or butter, softened
1 cup Gold Medal Better for Bread™ flour
1 cup Gold Medal whole wheat flour
2 tablespoons packed brown sugar
1 teaspoon salt

1 1/2 teaspoons regular active dry yeast
OR
1 1/2 teaspoons bread machine yeast or quick-acting active dry yeast

Filling:
1 1/2 cups chopped apples
1/3 cup packed brown sugar
1 tablespoon Gold Medal Better for Bread flour
2 tablespoons raisins
2 tablespoons margarine or butter, softened
1/8 teaspoon salt
1/8 teaspoon ground nutmeg
1/8 teaspoon ground cardamom

DIRECTIONS:
1. Place all Dough ingredients in bread pan in the order listed. Select WHOLE WHEAT DOUGH cycle.
2. Grease cookie sheet. Cook all Filling ingredients over medium heat, stirring constantly, until apples are tender; remove from heat. Roll dough into 13x8-inch rectangle on lightly floured surface; place on cookie sheet. Spread apple filling lengthwise over center third of rectangle.
3. Make cuts from filling to edge of dough at 1-inch intervals on each 13-inch side of rectangle to make strips. Fold strips at an angle over filling, alternating sides. Cover; let rise in warm place 30 to 45 minutes or until double.
4. Heat oven to 375°. Bake 30 to 35 minutes, covering with aluminum foil during last 10 minutes to prevent excessive browning. Remove from cookie sheet. Cool on wire rack. Drizzle with Browned Butter Glaze or Creamy Vanilla Glaze (page 49) if desired. 1 coffee cake.
Breadsticks

Dough:
1 cup plus 2 tablespoons water
3 tablespoons margarine or butter, softened
3 cups Gold Medal® Better for Bread™ flour
2 tablespoons sugar
1 1/2 teaspoons salt
2 1/4 teaspoons regular active dry yeast
OR
2 1/4 teaspoons bread machine yeast or quick-acting active dry yeast

Topping:
1 tablespoon water
1 egg white
Sesame seed

DIRECTIONS:
1. Place all Dough ingredients in bread pan in the order listed. Select WHITE DOUGH cycle.
2. Grease cookie sheet. Divide dough into 30 pieces. Roll each piece into 8-inch rope. Place 1 inch apart on cookie sheet. Cover; let rise in warm place 20 to 25 minutes or until puffy.
3. Heat oven to 350°. Beat 1 tablespoon water and the egg white; brush over dough. Sprinkle with sesame seed. Bake 15 to 20 minutes or until breadsticks are golden brown. 30 Breadsticks.

Brioche

Dough:
1/3 cup water
1/3 cup margarine or butter, softened
4 eggs
3 1/2 cups Gold Medal Better for Bread™ flour
1/2 cup sugar
1 teaspoon salt
1 teaspoon grated orange or lemon peel
2 1/2 teaspoons regular active dry yeast
OR
2 1/2 teaspoons bread machine yeast or quick-acting active dry yeast

Topping:
1 tablespoon milk
1 egg yolk
coarse sugar crystals

DIRECTIONS:
1. Place all Dough ingredients in bread pan in the order listed. Select SWEET DOUGH cycle.
2. Place dough in greased bowl, turning to coat all sides. Cover with plastic wrap; refrigerate 4 hours or overnight.
3. Grease 18 medium muffin cups, 2 1/2 x 1 1/4 inches. Punch down dough. Divide into 3 parts. Divide each part into 6 pieces. Cut off one-fourth of the dough from each piece. Shape each large and small piece into a smooth ball. Place each large ball in muffin cup, pressing to fill bottom of cup. Make an indentation in center. Press small ball into indentation. Cover; let rise in warm place 50 to 60 minutes or until double.
4. Heat oven to 350°. Mix 1 tablespoon milk and 1 egg yolk; gently brush over tops of rolls. Sprinkle with sugar crystals. Bake 15 to 20 minutes or until golden brown. Remove from pan. Serve warm. 18 brioche.
Calzones

Dough:
1 cup water
1 tablespoon olive or vegetable oil
2 1/2 cups Gold Medal Better for Bread™ flour
1 teaspoon sugar
1 teaspoon salt
2 1/4 teaspoons regular active dry yeast
OR
2 1/4 teaspoons bread machine yeast or quick-acting active dry yeast

Pesto Filling:
6 sun-dried tomato halves (not oil-packed)
6 tablespoons pesto
1 1/2 cups shredded mozzarella or provolone cheese (6 ounces)
4 ounces Canadian-style bacon, cut into thin strips (about 1 cup)
1 cup sliced mushrooms
Freshly ground pepper
1 egg, slightly beaten

DIRECTIONS:
1. Place all Dough ingredients in bread pan in the order listed. Select WHITE DOUGH cycle.
2. Heat oven to 375°. Grease cookie sheet. Soak tomatoes in 1 cup very hot water about 5 minutes or until softened; drain and finely chop. Divide dough into 6 equal parts. Roll each part into 7-inch circle on lightly floured surface with floured rolling pin. Spread 1 tablespoon pesto on each circle to within 1 inch of edge. Layer cheese, bacon, mushrooms and tomatoes on half of each circle to within 1 inch of edge. Sprinkle with pepper.
3. Fold dough over filling; fold edge up and pinch securely to seal. Place on cookie sheet. Brush with egg. Bake 25 to 30 minutes or until golden brown. 6 calzones.
Caramel-Pecan Rolls

Dough:
1 cup water
1 egg
2 tablespoons margarine or butter, softened
3 1/4 cups Gold Medal Better for Bread™ flour
1/4 cup sugar
1 teaspoon salt
2 teaspoons ground cinnamon
3 teaspoons regular active dry yeast
OR
3 teaspoons bread machine yeast or quick-acting active dry yeast

Topping:
1/3 cup margarine or butter, melted
1/2 cup packed brown sugar
1 tablespoon corn syrup
2/3 cup pecan halves
1/2 cup granulated sugar

DIRECTIONS:
1. Place all Dough ingredients in bread pan in the order listed. Select SWEET DOUGH cycle
2. Grease 13x9x2-inch rectangular pan. Mix 1/3 cup margarine, the brown sugar, corn syrup, and pecan halves. Spread mixture in pan.
3. Mix 1/2 cup granulated sugar and the cinnamon. Flatten dough with hands or rolling pin into 15x10-inch rectangle. Spread with 2 tablespoons margarine; sprinkle with sugar-cinnamon mixture. Roll up tightly, beginning at 15-inch side. Pinch edge of dough into roll to seal. Cut roll into 1-inch slices. Place in pan. Cover; let rise in warm place about 1 hour or until double.
4. Heat oven to 375°. Bake 22 to 27 minutes or until golden brown. Immediately invert pan onto heat proof serving plate or tray. Let pan remain a minute so caramel can drizzle over rolls. 15 rolls.

Commonly Asked Questions

Why did my bread turn out like lead, resembling a hockey puck?
Perhaps you forgot the yeast (we can all error!) or you used stale yeast, extra salt or sugar or hot liquids that may have killed the yeast and inhibited rising.

Why does my loaf look caved in on top?
Perhaps there was too much liquid or moisture from fruits or vegetables or cheese. It may have risen too fast due to too much yeast. You'll be surprised to find when you cut the top off that you will have a tasty loaf with a coarse texture.

Why does my loaf look lumpy or an uneven shape on top?
Perhaps there wasn't enough moisture. Sometimes heavier textured breads appear this way.

Why does my loaf have large holes?
There was probably too much yeast or moisture.

Why does my recipe turn out perfect most of the time but does not occasionally?
Perhaps the humidity in the air or the moisture in the flour varied causing the dough to be stickier or drier OR the room temperature was cold or very hot. Remember the machine cannot make judgment calls for those variables.

Why are there deposits of flour on the side of the baked loaf?
Perhaps with a heavier bread all the dry ingredients did not get mixed in the kneading; the next time you could try using a rubber spatula to push down ingredients on the sides of the pan, after the first kneading cycle.

Why do the raisins and dates seem to be clumped together at the bottom or the loaf?
The raisins and dates were too sticky. Try air-drying them overnight on the counter or buying date pieces that have a dextrose coating on the outside.
Care and Cleaning
Instructions

Cleaning the Bread Maker

Before cleaning the Bread Maker, unplug it and allow it to cool. To clean, wipe manually: Do not immerse in water! And make sure to use only a mild kitchen detergent -- benzine, cleaners, scrubbing brushes, and chemical cleaners will damage the unit.

Before re-using the unit, make sure it is completely dry.

Body and Lid
1. Remove all bread crumbs by wiping gently with a slightly damp cloth.
2. As you wipe, take care not to bend the temperature sensor, which is located on the inside wall of the Bread Maker.

Baking Pan and Kneading Blade
1. Wipe clean with a damp cloth and dry thoroughly.
2. Do not wash the pan or removable parts in the dishwasher.

Caring for your Bread Maker

Non-stick Pan and Blade
1. Keep your Bread Maker clean.
2. Do not use metal utensils. These will damage the non-stick coating on the pan and kneading blade.
3. Don’t worry if the non-stick coating changes color over time. The color change is the result of steam and other moisture and in no way affects the performance.

Storage
1. Make sure that the unit is completely cool and dry before storing.
2. Store the Bread Maker with the lid closed.
3. Do not place heavy objects on the top lid.
Baking at High Altitude

At High Altitudes above 3,000 feet, dough rises faster. Therefore, when baking in high altitudes some experimentation is required. Follow the suggested guidelines. Using one suggestion at a time and remember to write down which suggestions work best for you.

Guidelines:

1. Reduce the amount of yeast by 25%. This will inhibit the bread from over rising.

2. Increase salt by 25%. The bread will rise slower and have less of a tendency to sink.

3. Watch your dough as it mixes. Flour stored at High Altitudes tends to be drier. You might have to add a few tablespoons of water, until dough forms a nice ball.
